---------------------------	---

- 10/2020-2/2021** **Research Triangle International**
Clinical Interviewer
Description: International organization that conducts research on a variety of psychological topics. This research project focused on establishing prevalence rates of specific mental illnesses, such as depression, anxiety, psychosis, eating disorders, and posttraumatic stress disorder.
Responsibilities: Conduct virtual clinical interviews with participants, using a modified version of the Structured Clinical Interview for DSM-5 (SCID-5). Use participant responses and ratings to determine relevant diagnosis, if applicable. Attend weekly calibration meetings to keep clinical ratings consistent across interviewers.
- 1/2018-6/2018** **Graduate School of Professional Psychology, TBI Grant**
Psychometrist
Description: Funded research project studying the correlation between TBI and criminal behavior. This project administered neuropsychological screens to justice-involved individuals in order to provide tailored recommendations for their probation officers and for the clients in order to reduce recidivism rates. Screenings took place at probation offices and local courthouse for individuals involved in the justice system due to drug-related charges and had sustained head injuries.
Responsibilities: Administer neuropsychological screens for traumatic brain injuries to justice-involved individuals, perform clinical interviews, write clinical reports, and provide assessment feedback
Supervisors: Isaac Florez, PsyD and Kim Gorgens, PhD
- 6/2012-5/2013** **Harvard University**
Field and Lab Research Assistant
Responsibilities: Investigate patterns of mortality among whitebark pines in Montana and assess the impact of climate change on sugar maples in the Northeast through data collection, data analysis, and project design
- 11/2011-4/2012** **University of Oregon Streisfeld Lab**
Lab Assistant
Responsibilities: Collect data on several varieties of *Mimulus* plants for research on anthocyanin as it relates to plant fitness
- 11/2011-3/2012** **University of Oregon Biogeography and Paleoecology Lab**
Lab Assistant
Responsibilities: Assist in analysis of lake sediment cores to reconstruct past flora configurations of the Idaho panhandle and central British Columbia during the most recent ice age to determine the possibility of glacial refugia

Work Experience

- 7/2019-5/2020** **Birch Psychology**
Psychometrist
Description: Private practice specializing in infant and child mental health

Responsibilities: Score cognitive, neuropsychological, personality, symptom inventory assessments; assist in report writing, as needed

**9/2016-
